

PRODUCT DATA SHEET

RHB-20ATC Brix Refractometer

1. With Built-in ATC compensation Range (Automatic Temperature Compensation) from 10°C to 30°C
2. For field use, without having to re-calibrate after changes in ambient working temperature.
3. Soft rubber eye piece for comfortable viewing
4. Equipped with scale measurement which provides direct reading
5. Accurate testing results guaranteed
6. Extremely easy-to-use and calibrate
7. Durable and built to last long
8. Adjustable manual focusing
9. Uses ambient light only which means battery or power source is not required.
10. Cushioned with soft & comfortable non-slip rubber

Specifications:

- SCALE: Brix scale: 0 to 20%Brix
- Minimum Division: 0.1%Brix
- Accuracy: 0.1%Brix
- Reference Temperature: 20°C
- ATC (Automatic Temperature Compensation)
Compensation Range: 10°C~30°C (50°F~86°F)
- Manual calibration with mini-screw driver provided

Package ประกอบด้วย:

- 1 x Refractometer
- 1 x Pipette
- 1 x Screw driver
- 1 x Cleaning cloth
- 1 x English Instruction manual
